

# ATTENTION!

## Building Owners, Contractors, Management Companies, Construction Companies, and Business Owners

According to The Rules for the City of New York Fire Department (3 RCNY Section 115-02), FDNY is requiring portable fire extinguisher sales (PFE) and servicing companies to use FDNY-Issued, numbered tags as proof of compliance. The tags have been designed with various security measures to prevent counterfeiting.

### HOW DOES THIS AFFECT YOU?

- 🔥 The new FDNY Rule (3 RCNY 115-02) will take effect on June 1, 2018
- 🔥 New tags must be used for new equipment / installations / service as of October 1, 2018

### HOW CAN SSU HELP YOU?

- 🔥 SSU is one of the few FDNY approved providers that are authorized to replace the tags.
- 🔥 Our expert team of technicians will assist you to comply with this new regulation
- 🔥 SSU will replace all tags for current clients or new clients **AT NO ADDITIONAL FEE** as long as a company commits to hiring SSU for fire extinguisher service and inspections (signed proposal required)
- 🔥 Our certified technicians will be available to replace out old tags with new tags on your site upon performing an inspection
- 🔥 SSU will ensure that your job remains safe and in compliance with FDNY rules with the right fire safety equipment, proper tags, inspections, and repairs

**NEW RULE WILL BE ENFORCED ON OCTOBER 1<sup>ST</sup>**

**SERVICE CALLS WILL BE SCHEDULED ON A  
FIRST COME FIRST SERVE BASIS**

The TSC team of professionally trained fire safety personnel are made up of mostly retired firefighters. Construction Fire Safety Managers (CFSM) are required on construction sites when a Licensed Site Safety Manager or Safety Coordinator is required.

**The Construction Fire Safety Manager will assist the project management team in improving the effectiveness of fire safety initiatives at the construction project, by:**

- Conducting daily inspections of the construction and/or demolition site
- Taking fire safety measures
- Maintaining a record of inspections
- Supervising, issuing, and authorizing hot work operations and monitoring the operations of fire guards

**TSC has professionally trained Fire Guard personnel which are required when a fire protection system is out of service, to make regular inspections and patrols, once per hour to:**

- Check the premises for potential ignition sources
- Ensure proper storage of flammable or combustible materials
- Confirm only approved electrical devices are being properly used
- Check for current inspection logs, required Fire Department permits, certificates and ensure compliance with fire safety regulations

**TSC can also provide an EAP/Fire Safety Director experienced with and knowledgeable of applicable fire and safety requirements of governing laws, rule, regulations and good safety practices.**
